## WORK EXPERIENCE

### PROJECTS PARTICIPATED

Mini-calendar: window application programmed in C#

Library management: window application programmed in VB.net with 3-tier architect

Castle Varnia: game DirectX programmed in C++

eShopping: online shopping application on Android OS, programmed in JAVA

Weather forecast application on Android OS, programmed in JAVA

AssetManagement + CoffeeShopManagement: web application using .NET Core + Angular

DESIGNVELOPER

7/ 2019 - 8/ 2019

Internship

Working on an Ecommerce web app for shops that want to sell their clothes by myself with Reactjs for front-end and Meteorjs + MongoDB for back-end. I had to learn all of those things and completed the given project in only one month.

DESIGNVELOPER

9/ 2019 - 10/ 2019

Front-end Developer

Working as a front-end developer at Designveloper from September to the end of October, I joined 2 project:

1. Mekongdepot: an ecommerce web app.

- Made a style guide for customer, create most of components using in entire project followed given design (e.g: button, datepicker, toastify, tab, ...)
- Made login and sign up feature using redux form.
- Completed all project assignments on time (or ahead of schedule sometimes)

2. Guitar app: a mobile app developed by React Native that allow user testing their knowledge of guitar and music theory

- I and one other colleague joined in version 2 of that app.
- Responsible for the production and restructure app.
- Estimated time of completion

## CONTEST
