SKILLS

Front End	HTML, CSS, SASS, JavaScript, ES6, ReactJS, Socket.io, RESTful API, Redux, Bootstrap4, Thunk, Ant Design
Back End	NodeJS, Socket.io, Express, MySQL, MongoDB

INTERESTS

I like learn new technology

PROJECTS

Back end App
(2020 - 2020)

Customer	E-Groups
Description	-These projects help me better understand APIs than do socket notification functions, better understand blockchain
Team size	2
My position	Back End
My responsibilities	+ ITC Portal : - IOS: https://apps.apple.com/kh/app/itc-portal/id1527787759 - Andorid : https://play.google.com/store/apps/details?id=com.ITC.ITC&hl=vi + Vina Wallet : - Andorid : https://play.google.com/store/apps/details?id=com.vinawallet.net + Blockchain Farm - Andorid : https://play.google.com/store/apps/details?id=com.blockchainfarm
Technologies used	NodeJS Socket

Boho
(2020 - 2020)

Customer	Project Personal
Description	- This project helps me to use the library as GSAP effects and use grunt
Team size	1
My position	Front End
My responsibilities	- Source code: https://github.com/vinhkien123/boho.git - Link Live : https://boho-dvk.surge.sh/
Technologies used	Grunt HTML SCSS GSAP

Project Fake Tiki
(2020 - 2020)

Customer	QT-Data
Description	- Project has functions such as tiki page - This project helps me to use logic more fluently and master LifeCycle reactJS, loading website without successfully calling API, take advantage of reactJS call API to change data without reloading Website, split nest folder project function well and coordinate with BackEnd side. The current project only works mostly on functions and the interface is waiting for the design side.
Team size	1

My position	Front End, Back End
My responsibilities	- Source code Front End : https://github.com/vinhkien123/projectfaketiki - Source code Back End : https://github.com/vinhkien123/backend.git
Technologies used	ReactJS Redux Redux-thunk Bootstrap4 Ant design Slick-carousel Formik Nodejs Express

Project Chat Online
(2020 - 2020)

Customer	Project Personal
Description	- This project gives me knowledge of socket.io for building Real-Time applications and some knowledge of NodeJS
Team size	1
My position	Front End, Back End
My responsibilities	- Srouce code Front End & Back End : https://github.com/vinhkien123/chat
Technologies used	ReactJS Redux Socket.io NodeJS

Elearning
(11/2019 - 12/2019)

Customer	Project Personal
Description	- Project has functions such as tiki page - This project helps me use ES6 better, learn books using Routing and decentralize client, Admin. Use Redux to store and exchange information among components. Use Axios to get API about use, Redux-Thunk middleware to handle asynchronous aciton between using API and Redux. Sweetalert2 to create notifications for website activities. Use Yup to validate data in the Form. Install node-sass to write sass in reactJS
Team size	1
My position	Front End
My responsibilities	- Srouce code : https://drive.google.com/file/d/1UkYEMGvSBlNMucfqHJ9NwSiTHYAhUqFq/view
Technologies used	HTML SASS ReactJS Redux Bootstrap4

Mercedes
(11/2019 - 12/2019)

Customer	Project Personal
Description	- This project helped me learn how to design Responsive interface by Bootstrap 4, build Webiste by SASS. Use AOS as an effect for the Website
Team size	1
My position	Front End
My responsibilities	- Srouce code : https://drive.google.com/file/d/1UkYEMGvSBlNMucfqHJ9NwSiTHYAhUqFq/view
Technologies used	HTML SASS Bootstrap4
